

✗ What Acoustic & Satellites Cannot Answer

? "How much water was recovered?"

? "How much is still being lost after repair?"

? "Can the result be independently replicated?"

? "What was the pre-repair baseline?"

Acoustic answers:
"Where is the leak?"

Electro Scan answers all four — in gallons per minute, at the defect level, repeatably.

✔ What Electro Scan Provides

Defect-level flow quantification (GPM/LPS per defect)

Pre-repair volumetric baseline & post-repair confirmation

600+ day repeatability — auditor-ready comparison data

Physics-based — not AI inference or acoustic estimation

MEASURED.
VERIFIED.
DEFENSIBLE.

USEPA 2024: only commercial tech for buried lead pipe ID without excavation
