

electroscaninc.

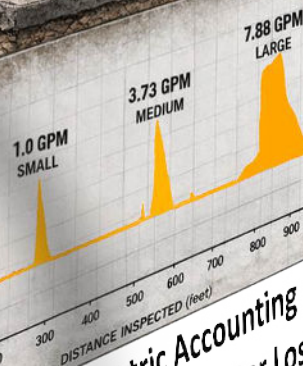

TRIDENT IN-PIPE PROBE
A conductive electrical signal is applied to the water column.

ELECTRICAL FIELD
Current flows out of the pipe through a leak, enabling detection and precise location.

WATER MAIN
Pressurized pipe
internal water flow

LEAK AT DEFECT
Water exiting the pipe
creates a detectable electrical signal.

SOIL SATURATION
Moisture visible in
the surrounding soil.

**Volumetric Accounting
of Recoverable Water Loss**
